

CLIMATE NEUTRALITY

CLIMATE FRIENDS.

In terms of ecological footprint, our "Made in Germany" products are clearly ahead of other imported articles. The production of senator® recycled or bio based writing instruments also supports regional and global climate protection projects.

SENATOR® IS CLIMATE NEUTRAL

A healthy environment plays a major role for us. That is why we pay special attention to sustainable materials and production processes, ecological compatibility, waste avoidance, resource conservation and recycling. For example, we only purchase green electricity from hydropower and at the same time invest in electricity-saving measures at our production site.

Another important step in holistic climate protection is the offsetting of greenhouse gases. For us, this means not only continuing our efforts to reduce them, but also recording unavoidable greenhouse

gas emissions and offsetting them through climate protection projects. For this reason, Senator GmbH is a climate-neutral company since 2021.

With the climate neutrality of our company, we support both regional and global climate protection projects. In this way, we also promote the achievement of the global Sustainable Development Goals, such as the fight against poverty or the improvement of living conditions in emerging and developing countries.

RECYCLED PENS

A total of 5 models are now available as an option made of recycled material. For the production, we use an ABS ReCompound based on >95% recycled material. This means reusing industrial production scraps and waste, returns and everyday products. The CO₂ emissions generated in the production of these products are offset by investments in climate protection projects.

BIO PENS

We have already had many years of experience in processing bio-plastic and have 4 models made of this material in our range. The bio material we process is a PLA (polylactic) obtained from sugar cane from certified GMO-free cultivation. The CO₂ emissions generated in the manufacture of these products are offset by investments in climate protection projects.

BIODEBASED PLASTICS AND RECYCLED PLASTICS

BIODEBASED PLASTICS (PLA)

We use a PLA based on renewable resources for our bio products. Our PLA is made from sugar cane. One of the most efficient raw materials for PLA production.

Material basis

PLA
(poly lactic acid from sugar cane)

Core characteristics

Pleasant feel and natural colours

CO₂ footprint

CO₂ reduced, as up to 85 % is organic / renewable

Information about material

Engraving on pen

We recommend

Additional text on the reverse of the pen

RECYCLED PLASTICS (R-ABS)

We use an ABS recompound based on >95% recycled material. This means reusing industrial production remnants and waste, returns and everyday products.

ABS
(Thermoplastic material)

High-quality surfaces

Up to 75 % less CO₂ compared to new ABS plastic

Engraving or print on the pen

e. g. "Climate neutral production with complete value chain in Germany. Free refill at refills.senator.com"

FREE REPLACEMENT REFILL

Once the refill is empty, it is easy to extend its life span. We offer all users of our writing instruments from Europe the opportunity to order a free replacement refill via our website **refills.senator.com**. You only pay a shipping fee of 1 €.

This avoids waste, protects the environment and extends the advertising life of your ball pen many times over.

BIOBASED AND RECYCLED PLASTICS

At senator® we actively follow the latest Research and Development in alternative materials to reduce the CO₂ footprint and see these developments very positively! Currently, we are already processing bio-based plastics from sugar cane in four successful ball pen models and producing five models from post-industrial recycled plastic.
