

ZERTIFIKAT*

CLIMATE-NEUTRAL NATURAL GAS THROUGH CO₂ COMPENSATION

SENATOR GmbH

Bahnhofstr. 57+78, 64401 Groß-Bieberau

has opted for the climate-neutral natural gas tariff NATURbalance
from ENTEGA Energie GmbH.

ENTEKA compensates the CO₂ emissions resulting from the production, transport and combustion of the natural gas delivered in the period 1/1/2020 to 12/31/2022. Natural gas consumption with an expected annual quantity of 1.541.554 kWh corresponds to an expected amount of 323 tonnes of climate-damaging CO₂.

The CO₂ emissions caused by this are offset by certified forest protection projects. This creates high environmental and socio-economic benefits. Forest protection and sustainable forest management promote sustainability in multiple dimensions.

In addition to the long-term bonding of CO₂ from the atmosphere, forests regulate water balance, protect the soil, protect biodiversity and offer the population livelihoods as well as valuable recreational space.

SENATOR GmbH will use climate-neutral natural gas from 1/1/2020 until at least 12/31/2022.

Darmstadt, 1/1/2020
